

**Warning.** The solution presented here may not work properly in some situations. How can you send feedback so I can fix the problem.

---

ReSSteem is a new project that creates the ability to track tags and people by generating an appropriate link for RSS readers.

## 1) How to start

The whole mechanism is to generate the appropriate link. For this purpose we use the Generator placed on the main page.

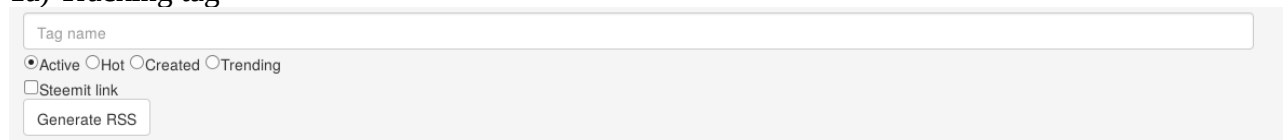

Go to the website: <http://ressteem.tk>

First, we choose whether we want to track the tag or user.

A light gray rectangular button with two lines of blue text: "ReSSteem Tag" on the top line and "ReSSteem User" on the bottom line.

Choosing the appropriate option will take us to the appropriate wizard.

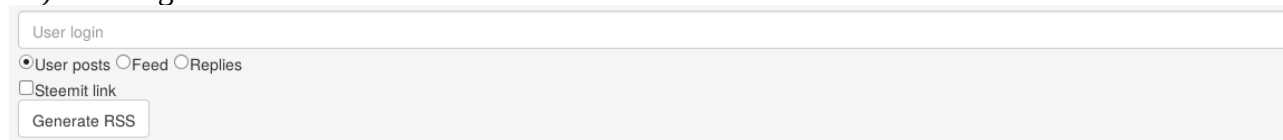

### 1a) Tracking tag

A screenshot of a web form for tracking a tag. It features a text input field labeled "Tag name". Below it are three radio buttons: "Active" (selected), "Hot", and "Created". To the right of "Created" is a radio button labeled "Trending". Below the radio buttons is a checkbox labeled "Steemit link". At the bottom left is a button labeled "Generate RSS".

When selecting tag tracking for the generator we have 3 fields to complete:

- Tag name,
- The group from which we take the last entries,
- Do RSS links to Steemit.com [checked] (or to Busy.org [unchecked]).

### 1b) Tracking User

A screenshot of a web form for tracking a user. It features a text input field labeled "User login". Below it are three radio buttons: "User posts" (selected), "Feed", and "Replies". Below the radio buttons is a checkbox labeled "Steemit link". At the bottom left is a button labeled "Generate RSS".

When selecting user tracking we have 3 fields to complete:

- User login (eg @fervi or fervi)
- The group from which the entries are to be taken.
- Do RSS links to Steemit.com [checked] (or to Busy.org [unchecked]).

## 1c) Link

User login

User posts  Feed  Replies

Steemit link

<http://ressteem.tk/rss.php?steemit=1&id=@fervi>

Once all the data has been filled out, a link will appear. This link is simply a resource for RSS. If someone has Firefox then the link will show the RSS feed.

## 2) Example

Data	Nagłówek
Dzisiaj 2:21	I have captured a moment, when STEEM is worth exactly 1 USD and SteemDollar is... not
Dzisiaj 2:21	[2017-05-16] Posty Polaków na Steemit z ostatnich 24 godzin
Dzisiaj 2:21	test test test3
Dzisiaj 2:21	steepshot test 2 :)
Dzisiaj 2:21	New SteepShot is released! - Here you have a VIDEO with demo of new logging mechanism, by QR code! :) No more typing of long posting keys!
Dzisiaj 2:21	[2017-05-17] Posty Polaków na Steemit z ostatnich 24 godzin
Dzisiaj 2:21	json_metadata
Dzisiaj 2:21	Przykładowy tytuł
Dzisiaj 2:21	Steem needs You! Last chance to support Steem by voting for it in the FINALS!
Dzisiaj 2:21	12 hours left
Dzisiaj 2:21	Map and analysis of ALL non-English European communities on Steemit with my advices about tags

## 3) How can I help you?

Send Feedback. I'm not able to check hundreds or thousands of users and tags. Simply add a comment.

Any other questions? Also add a comment.

## 4) This website is cool!

Vote Up and start tracking the #ressteem tag. You can also follow my @fervi profile.
